In the 10 years that have gone on in Krefeld, our trade fair has continued to grow. New this year is a large, third „dealer village" in the basement in the room „Klarheit“.

As a special highlight, Wally Malewicz will also offer private additional workshops alongside his public workshops. For visitors with very specific questions on the subject of Justage, Wally Malewicz will offer a private supplement in a small circle following his public workshop. This group (about 5 people) will be personally invited by Mr. Malewicz at the end of the workshop. Applications or reservations are not possible.

As always, the vintage-hi-fi room offers fascinating equipment from the 20th century.

The north german museum for hi-fi- and studio technique presents itself in the analog lounge. In addition, our main turntables have compiled a cost-effective entry-level system. This year, the showcase is dedicated to the topic of headphones. Please bring your own LPs to the demonstrations!
